My Experience with YCA

Hello!

My name is Ankur. I am presently studying in grade 10. It is a great pleasure being with the youth cricket academy. It is a place where I just didn't learn only batting and bowling but learned how to face the challenging situations in a real game. I am in this academy since it has started and just love going every week. This academy is the best place where I could start my cricketing career. It bought up my potential in this game. When I joined this academy I wasn't that good bowler but my coaches, coach Aruna, coach Suneth, coach Nuwan and coach Kasun worked with me regularly and improved my bowling. I have also toured Sri Lanka with the academy and it was indeed a informative tour, we got to learn a lot of things from this tour. At the end of this tour we were confident enough to play any type of game. In this academy I just didn't learn cricket but I also learned moral values, attitude towards the game and respect for seniors apart from cricket learning in this academy is also fun I have many enjoyable moments in this academy . So now I just enjoy working with the academy and hope for better improvements in my performance in the future and also hope for another tour from the academy. Because experience is the teacher of all things. Thank you!!
