Subject : Advice on Backyard Maintenance

Dear Residents,

When you are planning to do gardening and backyard maintenance involving excavation and digging for planting purposes, we advise you to contact the Landscaping Department and seek their guidance:

Why?

- Often residents use external workers helping with the backyard maintenance and they are unfamiliar with locations of underground irrigation pipes.
- Also not all residents may know what to do if an irrigation pipe bursts and how to stop the water flow, where to shut off valves and pumps, etc.
- When not a subject matter expert, get the information from an onsite professional or Landscape representative.

They will ensure you can plant flowers, shrubs, etc. without the uncertainty of damage to irrigation pipes or risking damage to Landlord or AKC property.

If you would like to inquire on how, kindly contact the Community Landscaping Department through e-mail at HKomiha@qatargas.com.qa or phone at 4473-4515 or Mobile at 77493182, for detailed information or queries.

Thank you for your usual cooperation.

Regards,

Meshal Saad Al-Humaidi
Head of Maintenance & Landscaping
